

360° Aircraft Storage Solutions

*Direct
aero services*

Ciudad Real Airport has an excellent dry warm climate with only 428 mm average annual rainfall

Our 360° aircraft storage solution offers the aircraft leasing industry and airline operators a comprehensive aircraft parking and storage service.

We understand the need to be able to park and store aircraft with ease in a safe environment. For this reason, we have selected the location of Ciudad Real Airport, Spain.

Located just some 180 km south of Madrid with a direct AVE rail connection to Ciudad Real, the airport is perfectly situated in the heart of Spain. It is close to the town of Ciudad Real with access to hotels, car rentals and motorway access to Madrid (typically driven within two hours). Given the excellent accessibility and facilities, we know that this location makes sense for any lessor or airline operator in need of parking or storage for their aircraft.

We have 75 parking slots available to us!

Key onsite facts:

- Runway length 4,100 meters; suitable for all aircraft types
- 24-hour onsite security
- Customs support through our local onsite agent
- Fuelling support
- Full technical support - We are partnered with a fully approved Part-145 maintenance organisation
- Records storage facilities, office spaces and warehouse space
- Full heavy maintenance support will be available in the future
- 75 aircraft parking slots

We offer you a comprehensive solution for the times you need aircraft storage - This is what we call the 360° aircraft storage solution:

- Aircraft delivery support
- Short-term and long-term parking and storage of aircraft
- Technical CAMO services
- Decals for reg/de reg are available
- Borescope inspections
- Full ferry flight services
- Aircraft transition and redelivery management
- Maintenance and event management
- Entry into service support
- Annual audits and inspections
- Pre-purchase inspections

Additional benefit

Direct Aero Services is a member of the Direct Aviation Group, as such, Direct Aero Services can avail the products and services from the companies operating within the Direct Aviation Group.

Full galley insert equipment refit for onward lessee can be provided through our sister company, Direct Air Flow, based in Nuth, The Netherlands.
